

## TempTex - Fire protection for cable and hoses

- Woven glasfiber with high temperature silicone coating.
  - Designed to protect cables against high temperature en occasionally flames and sparks.
  - Protection applications up to 1640°Celsius.
  - Resistent against all (hydraulic) fluids, oil, grease and fuels...
  - TempTex is ideal for protection high value cables and hoses at high temperature exposure.
  - TempTex is used for isolating hoses too prefenting high thermal losses.
  - Protectino operators against wounding at high temperature enviroments
  - Industry for use of TempTex: Hydraulics, Piping, Auto-Motor-sports, Ovens, Cooling, Energie handling...
  - On request we supply boxes of 15m.
- Type A (Aerospace) is available which meets high standards of the AS1055D-norm fully.
